

Zone Sensor Module

ZSM

The GridPoint Zone Sensor Module (ZSM) captures internal temperatures from locations within a facility and provides this localized data either directly to the thermostat or to a Remote Sensor Module (RSM) for analysis, allowing for more accurate temperature control.

Features and Specifications

General	Operating range	<ul style="list-style-type: none"> Temperature: -25°C to +70°C Relative humidity (non-condensing): 0% to 95%
Measurement	Onboard temperature sensor	<ul style="list-style-type: none"> Thermistor input Accurate to $\pm 1^{\circ}\text{F}$
Mechanical	Enclosure dimensions	3.0" H x 3.5" W x 1.3" D
	Enclosure material	Molded ABS plastic
